

# MILLIE JOINS AN FLY TEAM

Written and Illustrated By: SWAT 771

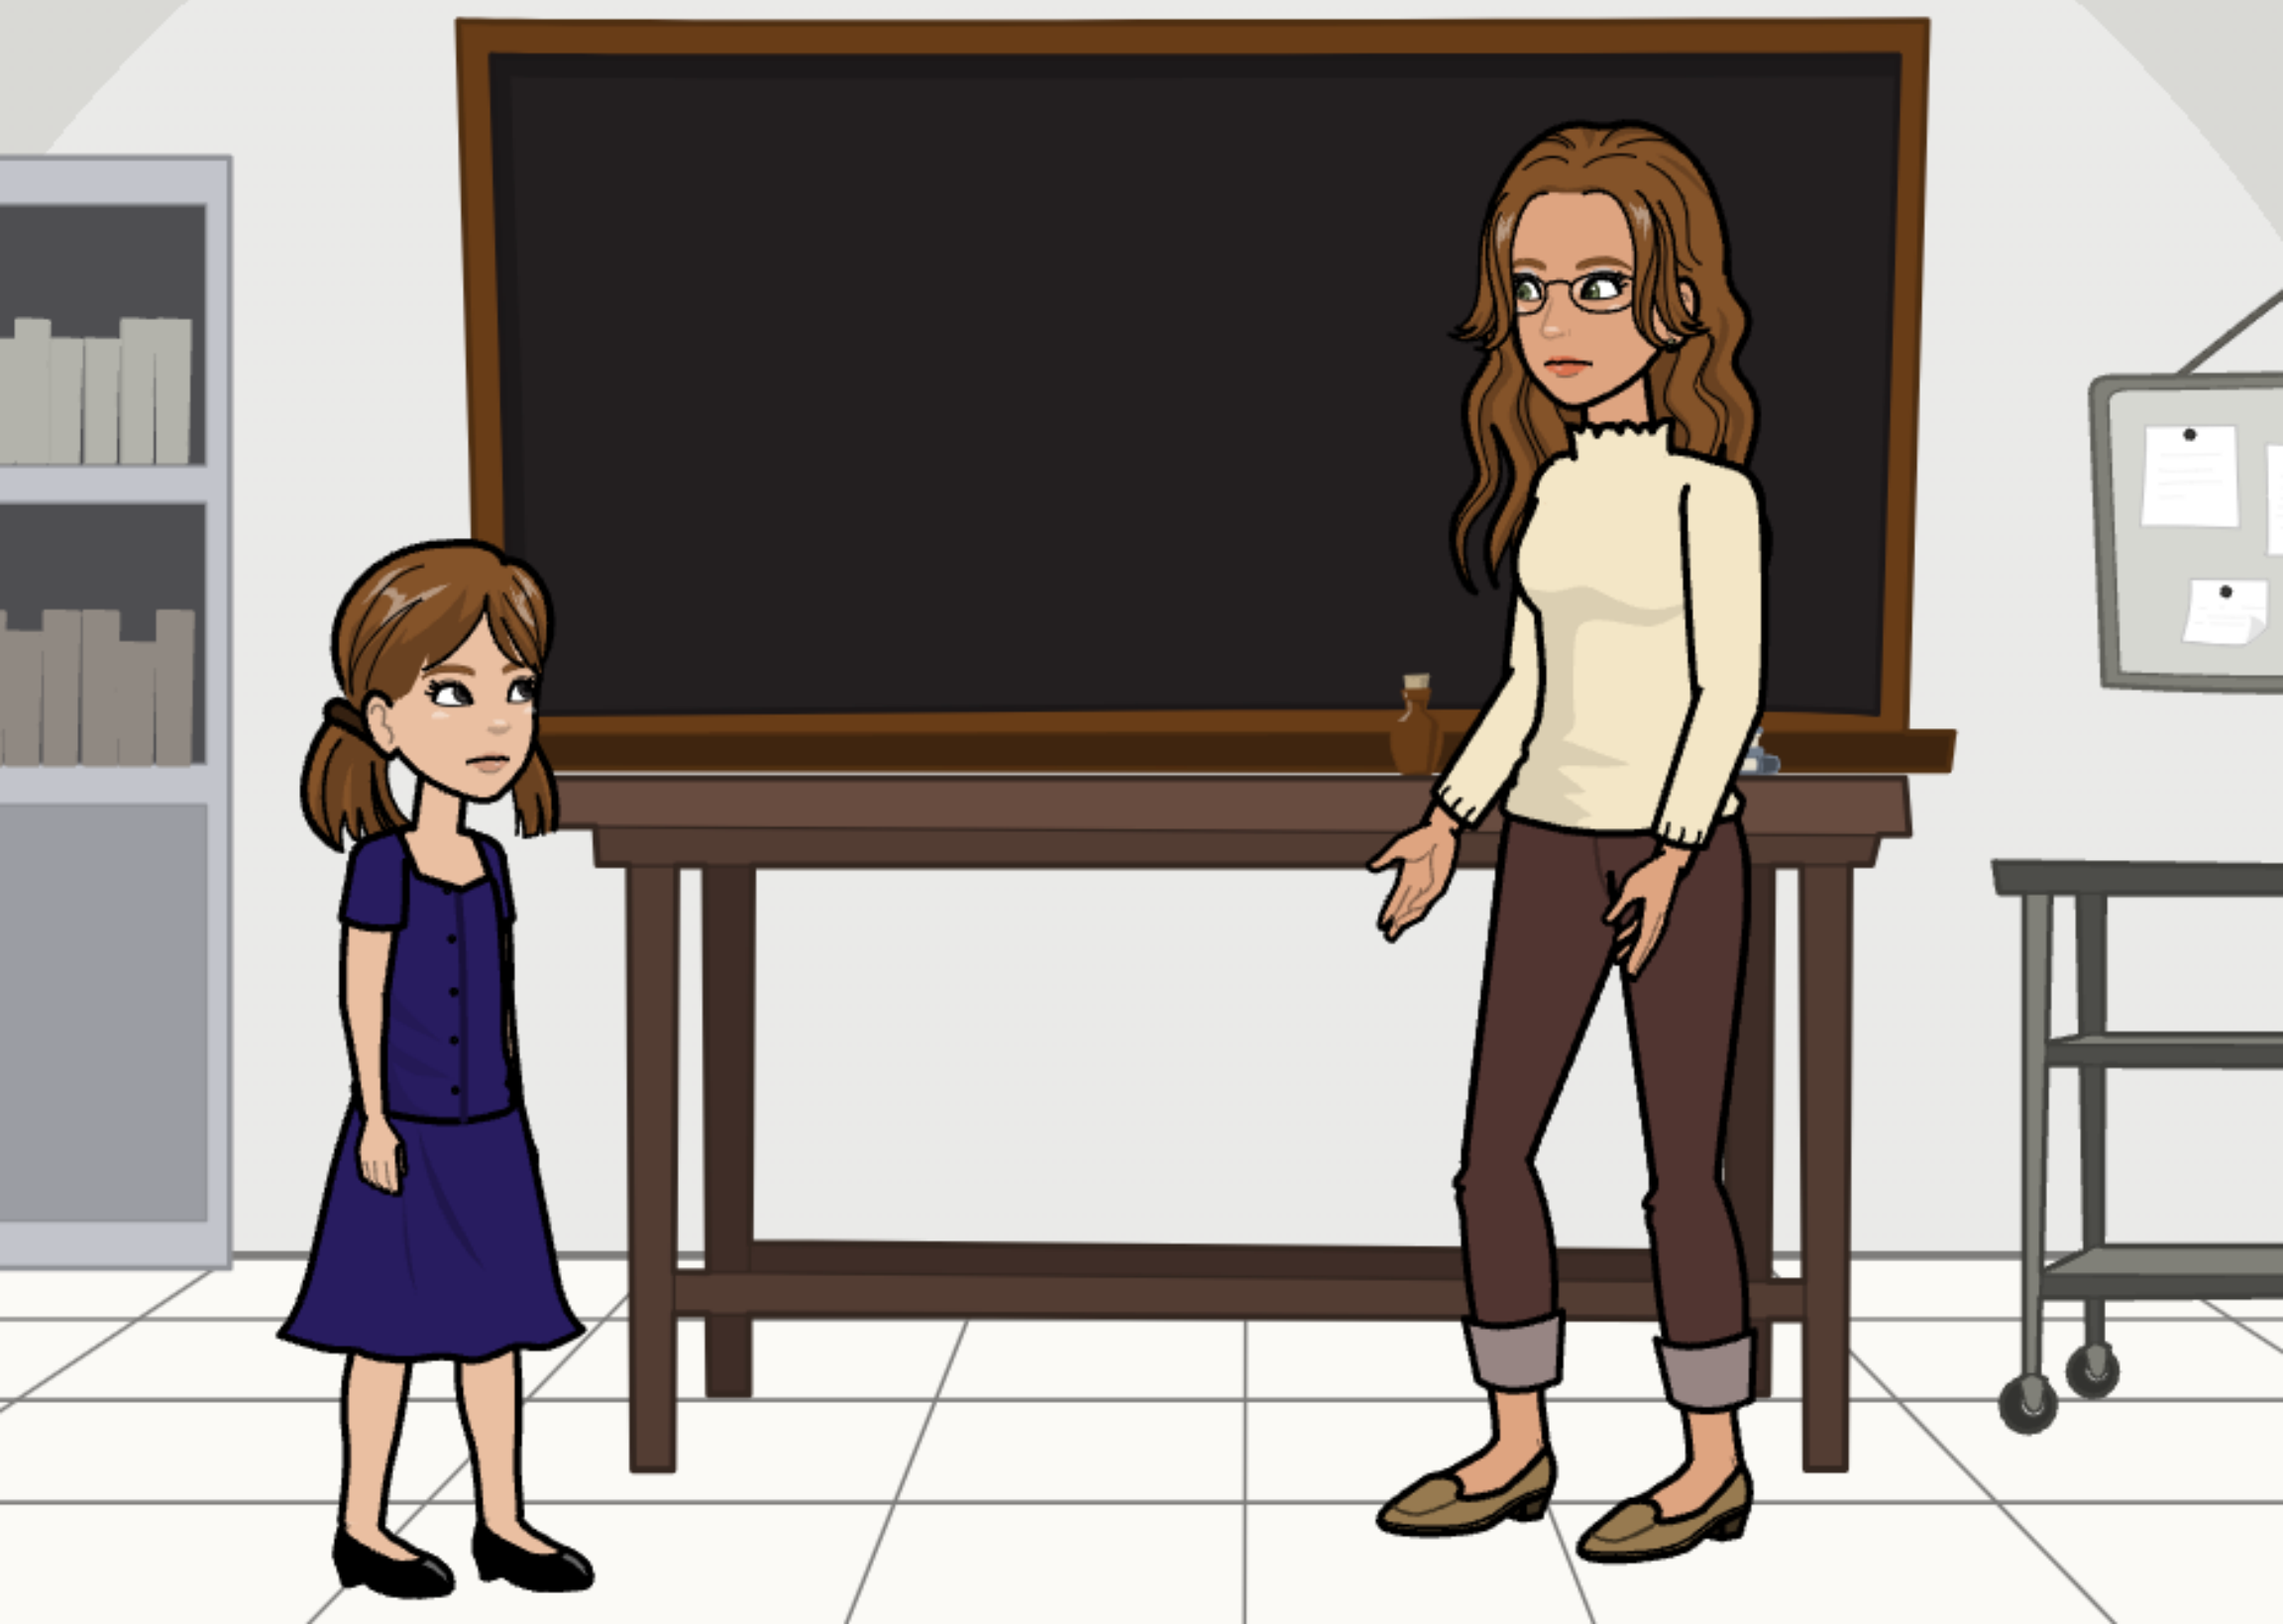

Since she was little, Millie dreamed of building her very own robots that could do incredible things. But, she never had a place where she could let her passions soar.

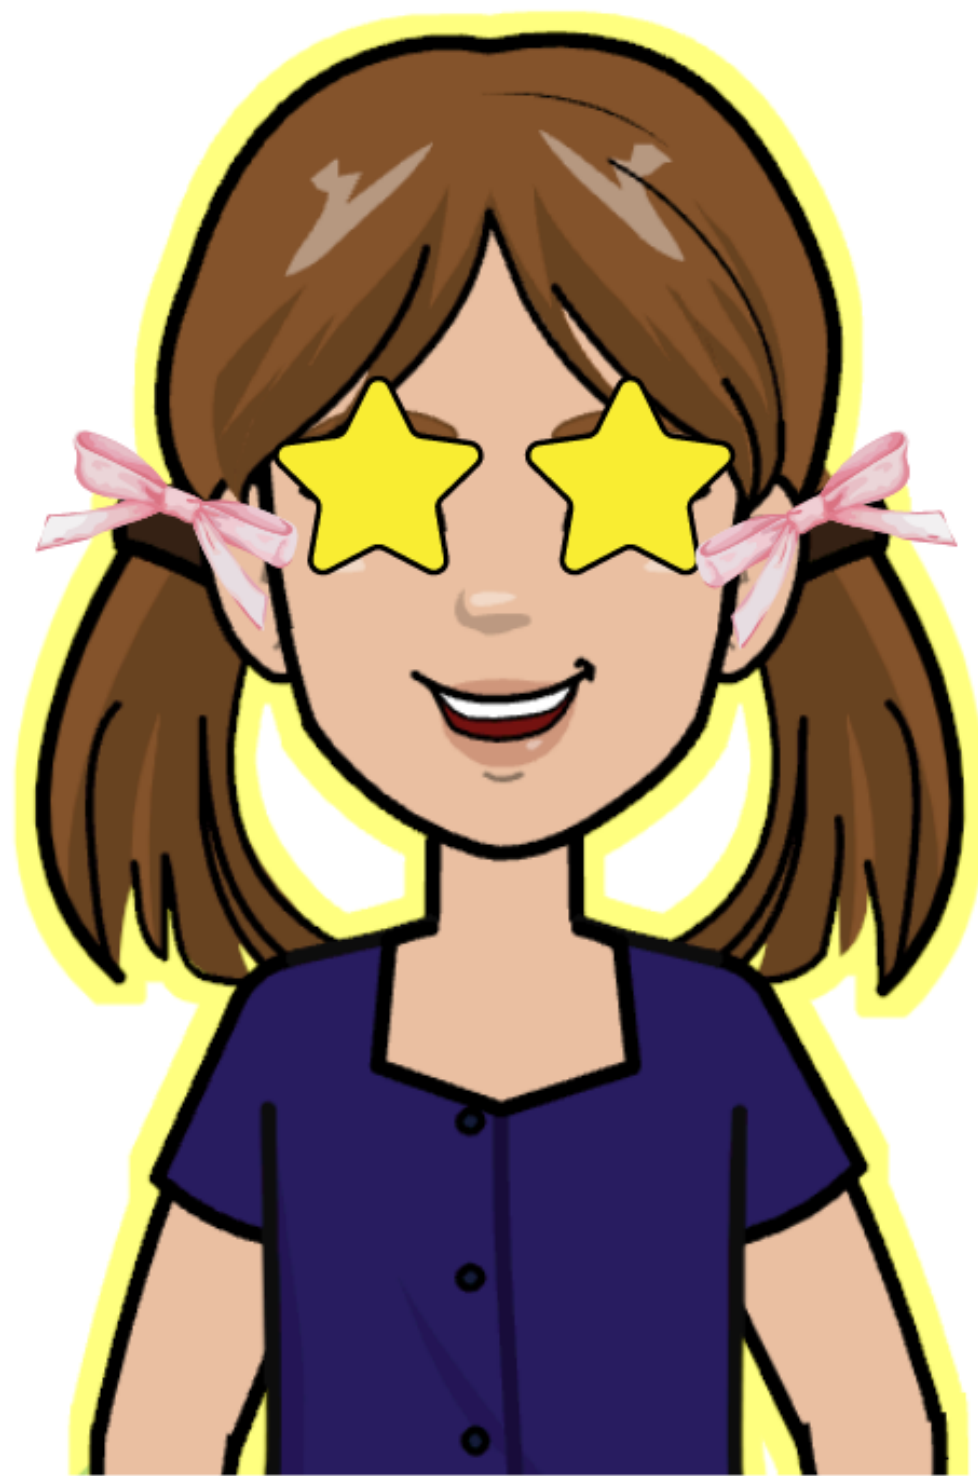

Millie loved doing puzzles. She spent hours putting pieces together and figuring out how they fit.

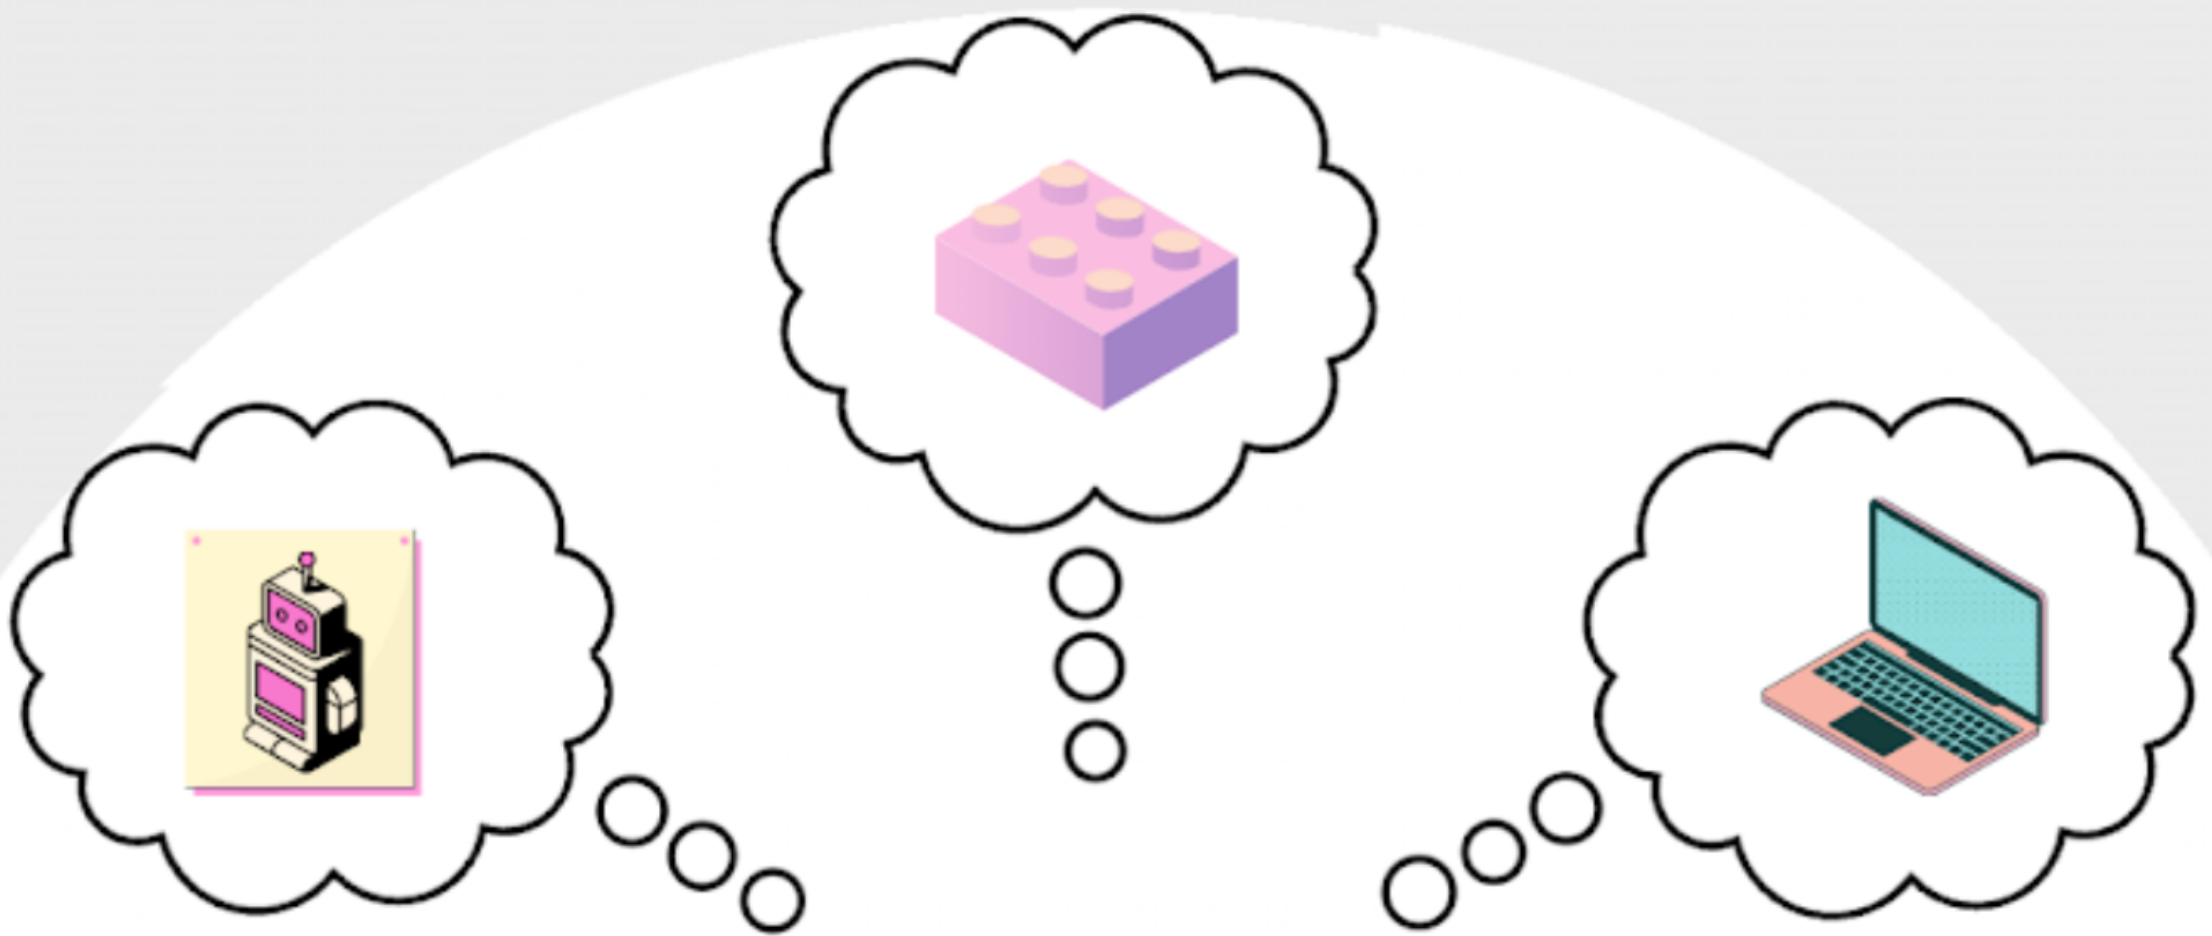

One day, Millie heard Ms. Wrench, her favourite teacher, talking about FIRST LEGO League (FLL). That was the day Millie found out about a magical place where kids just like her could come together to build robots and solve real-world problems.

Thinking about this, Millie's eyes lit up with excitement, and she decided to join the team that day!

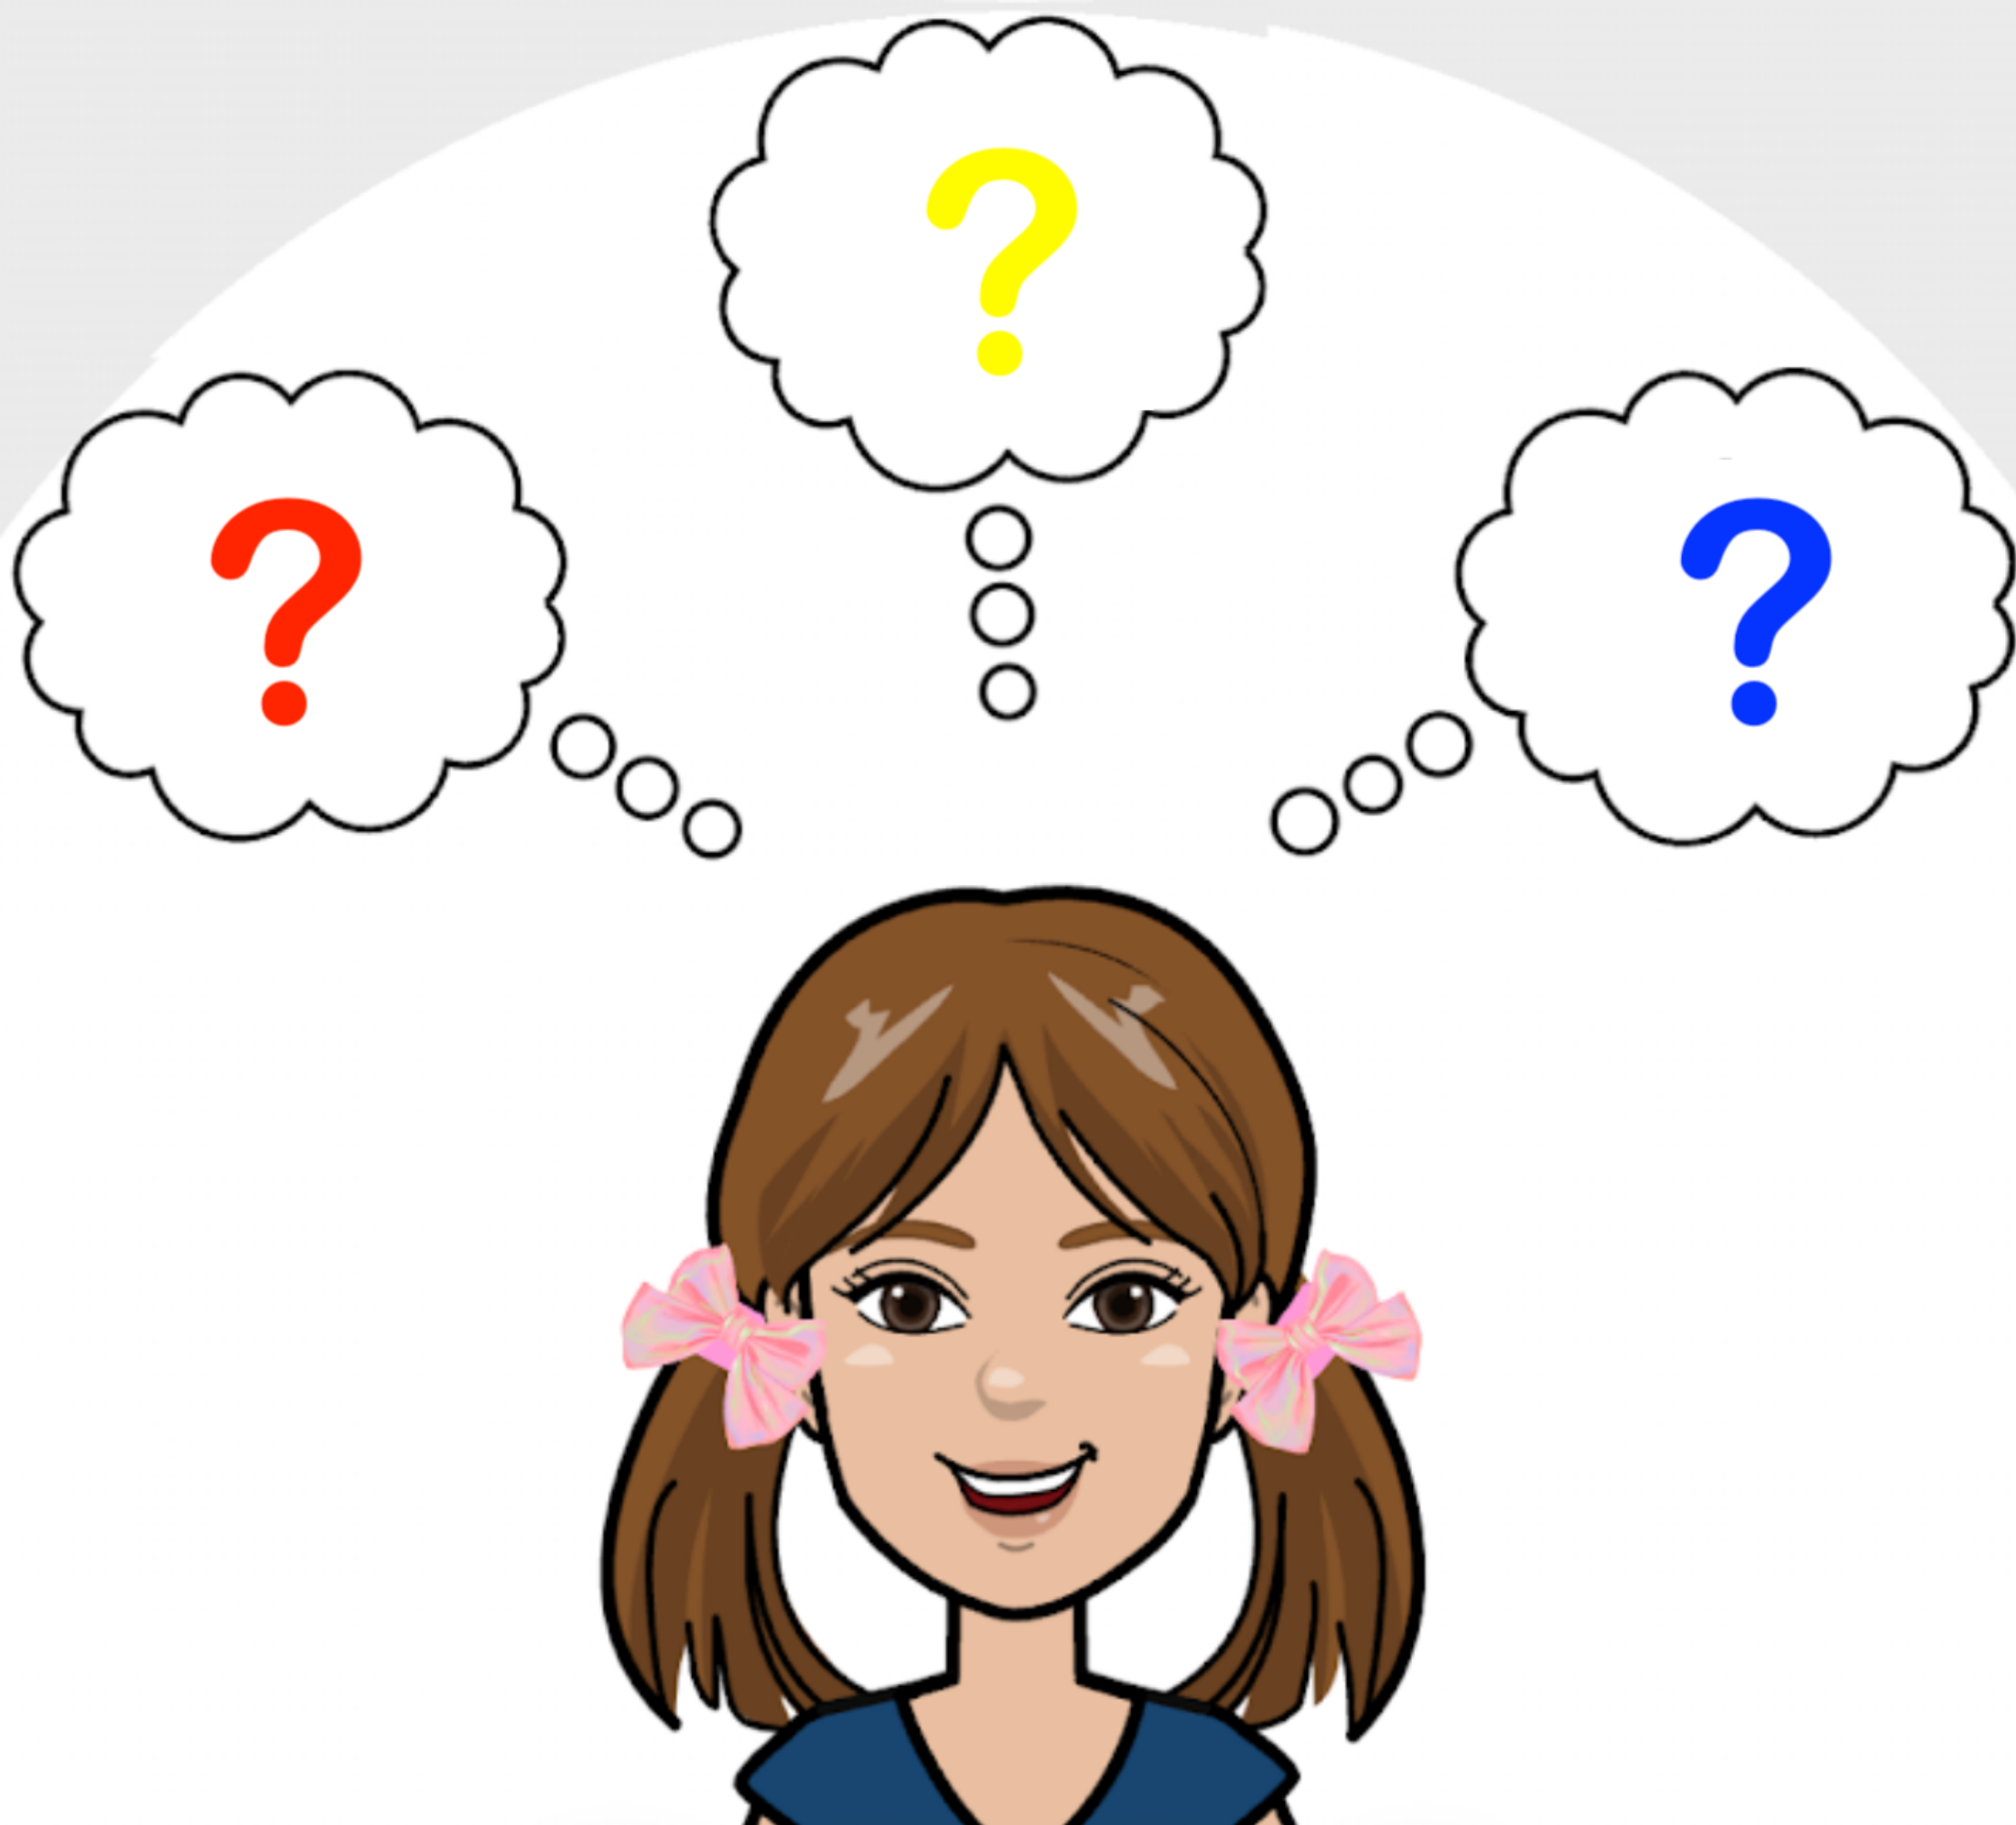

At her first FLL meeting, she met a team of other people who were just as excited about robotics as her!

Some of her friends liked programming, some liked to build the lego, and some wanted to create a solution to a real-world problem.

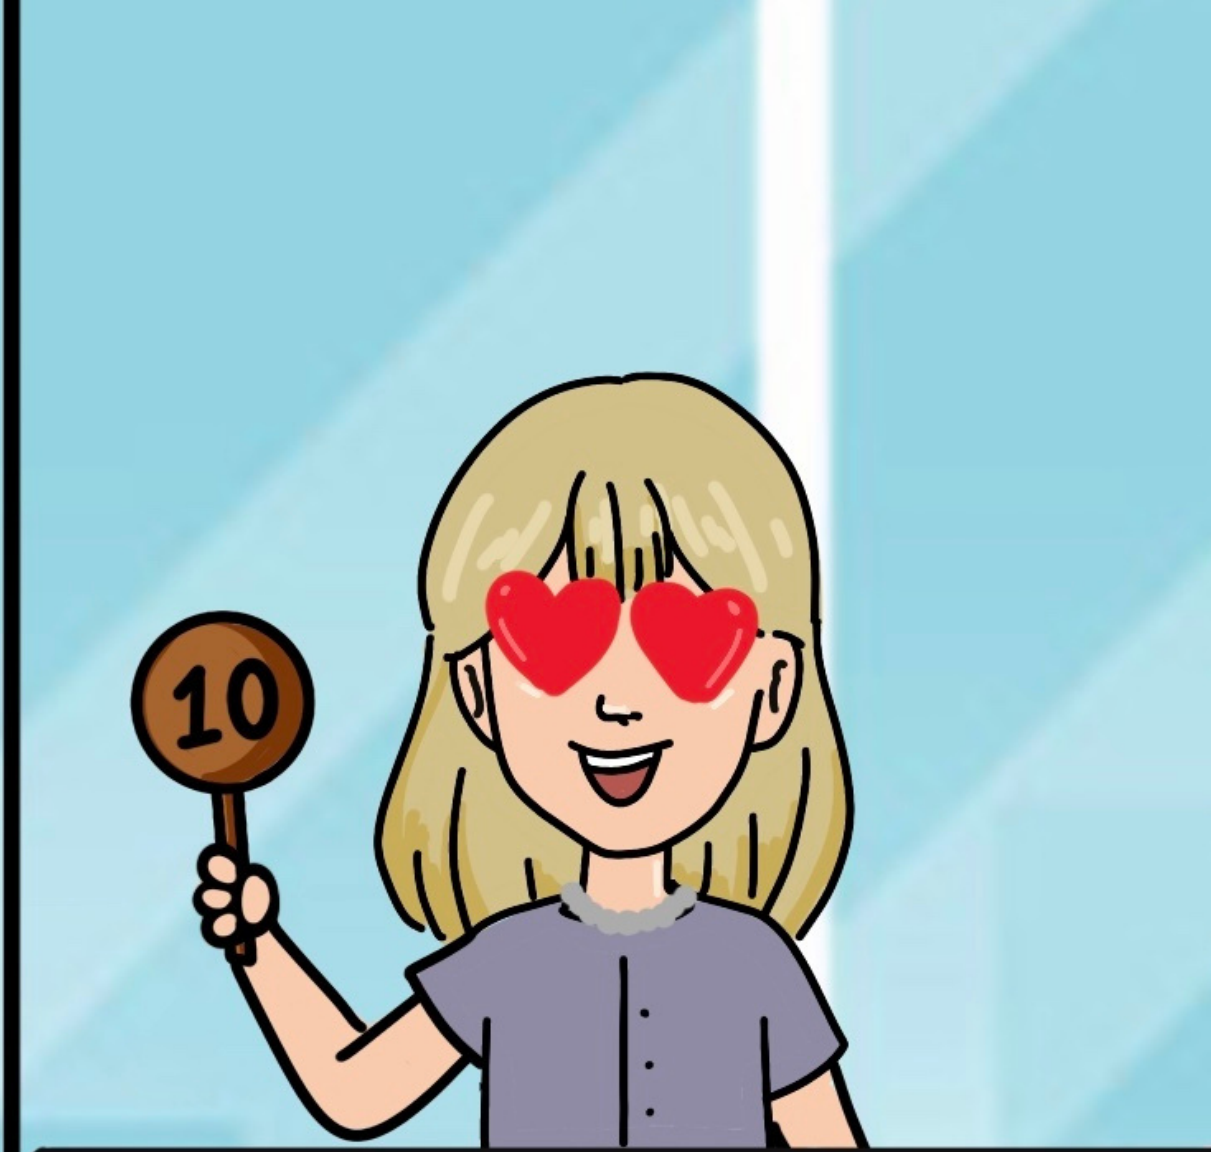

Millie didn't know what she wanted to do, but she did know she wanted to explore! She spent the next day learning from her new friends. Now, she was an expert!

The day of the competition, Millie and her team stood tall, ready to show the world what she learned and what they can do. Their robot amazed the judges with its colourful creations. But, even more impressive was Millie's determination to learn and share her passion with others.

*Judge*

As her team practiced for competition, Millie learned that teamwork and friendship were just as important as building the robot.

Millie's dream of building incredible robots had come true, and she knew that with her curiosity and the help of her friends and mentors, anything was possible!
